

## Clinica Chimica Acta, Vol. 172 (1988)

## Author index

- Agosti, S., see Diomedé, L. (172) 161
- Amuro, Y., Nakaoka, H., Shimomura, S., Tamura, S., Hada, T. and Higashino, K.  
Rapid high-performance liquid chromatography for pseudouridine assay in serum and urine (172) 117
- Anderson, J.V., see Meleagros, L. (172) 199
- Athias, A., see Gambert, P. (172) 183
- Ayrault-Jarrier, M., Petit, E., Bekaert, E.D., Robin, H., Pastier, D., Beucler, L., Polonovski, J., Hervaud, E. and Pau, B.  
Electroimmunoassay of human serum lipoproteins containing Apo A-I by monoclonal antibodies (172) 149
- Bachmann, C., see Vici, C.D. (172) 233
- Bailey, A., see Periquet, B. (172) 275
- Bailey, E.M., Seymour, P.M., Fulton, I., Price, C.P. and Luzio, J.P.  
A monoclonal antibody capture assay for intestinal alkaline phosphatase and the measurement of this isoenzyme in pregnancy (172) 267
- Bailey, E.M., see Seabrook, R.N. (172) 261
- Beckett, G.J., see Hayes, P.C. (172) 211
- Bekaert, E.D., see Ayrault-Jarrier, M. (172) 149
- Beucler, L., see Ayrault-Jarrier, M. (172) 149
- Biggart, E.M., see Series, J.J. (172) 217
- Bloom, S.R., see Meleagros, L. (172) 199
- Bouchier, I.A.D., see Hayes, P.C. (172) 211
- Bouzerand, C., see Gambert, P. (172) 183
- Boyle, F.A., Cook, N.D. and Peters, T.J.  
Inhibition of galactosyltransferase activity by cacodylate buffer (172) 291
- Burlina, A., see Vianello, F. (172) 335
- Chiba, P., Zwiauer, K. and Müller, M.M.  
Characterization of an adenine phosphoribosyltransferase deficiency (172) 141
- Cho, H., see Shiba, K.S. (172) 77
- Ciaffoni, F., see Vaccaro, A.M. (172) 323
- Colombo, J.P., see Vici, C.D. (172) 233
- Cook, N.D., see Boyle, F.A. (172) 291
- Dalzell, H., see Robertson, A.M. (172) 171
- De Leenheer, A.P., see Periquet, B. (172) 275
- Di Mario, F., see Vianello, F. (172) 335
- Diomedé, L., Masturzo, P., Agosti, S., Ornaghi, F. and Salmona, M.  
A rapid electrochemical assay of lecithin in amniotic fluid using a fluoride ion-sensitive electrode (172) 161
- Farnier, M., see Gambert, P. (172) 183
- Ferramola de Sancovich, A.-M., see Jackson, A.H. (172) 245
- Fulton, I., see Bailey, E.M. (172) 267
- Furuhata, N., see Shiba, K.S. (172) 77
- Gambert, P., Farnier, M., Bouzerand, C., Athias, A. and Lallemand, C.  
Direct quantitation of serum high density lipoprotein subfractions separated by gradient gel electrophoresis (172) 183
- Ghatei, M.A., see Meleagros, L. (172) 199
- Ghisolfi, J., see Periquet, B. (172) 275
- Gradwohl, M., see Vici, C.D. (172) 233
- Grinstein, M., see Jackson, A.H. (172) 245
- Gürakar, A.R. and Wolfbeis, O.S.  
A sensitive kinetic assay of serum albumin based on its enzyme-like hydrolytic activity, using a new chromogenic and fluorogenic substrate (172) 35
- Hada, T., see Amuro, Y. (172) 117
- Harada, T., see Shiba, K.S. (172) 77
- Harding, C.A., see Robertson, A.M. (172) 171
- Hashimoto, K., see Tatsumi, N. (172) 85
- Hashimoto, T., see Suzuki, Y. (172) 65
- Hayes, J.D., see Hayes, P.C. (172) 211
- Hayes, P.C., Hussey, A.J., Keating, J., Bouchier, I.A.D., Williams, R., Beckett, G.J. and Hayes, J.D.  
Glutathione S-transferase levels in autoimmune chronic active hepatitis: a more sensitive index of hepatocellular damage than aspartate transaminase (172) 211

- Hendriks, D., Soons, J., Scharpé, S., Wevers, R., Van Sande, M. and Holmquist, B.  
Identification of the carboxypeptidase responsible for the post-synthetic modification of creatine kinase in human serum (172) 253
- Hervaud, E., see Ayrault-Jarrier, M. (172) 149
- Higashino, K., see Amuro, Y. (172) 117
- Holmquist, B., see Hendriks, D. (172) 253
- Huff, J.K., see Sarraz, Jr., M.P. (172) 311
- Hussey, A.J., see Hayes, P.C. (172) 211
- Igarashi, N., see Suzuki, Y. (172) 65
- Ishizuka, T., Ito, Y., Mori, H., Miura, K., Nagao, S., Nagata, K.-i. and Nozawa, Y.  
Concanavalin A- or phorbol ester-induced translocation of protein kinase C in thymoma cells from a patient with myasthenia gravis (172) 109
- Ito, Y., see Ishizuka, T. (172) 109
- Jackson, A.H., Jenkins, R.T., Grinstein, M., Feramola de Sancovich, A.-M. and Sancovich, H.A.  
The isolation and identification of indigoid pigments from urine (172) 245
- Jenkins, R.T., see Jackson, A.H. (172) 245
- Kamiyama, Y., see Tanaka, A. (172) 93
- Kanamori, K., see Shiba, K.S. (172) 77
- Keating, J., see Hayes, P.C. (172) 211
- Khan, K., see Watts, G.F. (172) 191
- Kondo, H., Shiraishi, T., Nagata, K. and Tomita, K.  
An enzymatic method for the  $\alpha$ -amylase assay which comprises a new procedure for eliminating glucose and maltose in biological fluids (172) 131
- Kono, N., see Suzuki, Y. (172) 65
- Krikler, D.M., see Meleagros, L. (172) 199
- Kyoungoku, T., see Tatsumi, N. (172) 85
- Lallemant, C., see Gambert, P. (172) 183
- Lambert, W., see Periquet, B. (172) 275
- Lehnert, W. and Werle, E.  
Elevated excretion of *N*-acetylated branched-chain amino acids in maple syrup urine disease (172) 123
- Lindemans, J., see Van Kapel, J. (172) 297
- Luzio, J.P., see Bailyes, E.M. (172) 267
- Luzio, J.P., see Seabrook, R.N. (172) 261
- Maki, A., see Tanaka, A. (172) 93
- Malaisse-Lagae, F., Sterling, I., Sener, A. and Malaisse, W.J.  
Anomeric specificity of D-glucose metabolism in human erythrocytes (172) 223
- Malaisse, W.J., see Malaisse-Lagae, F. (172) 223
- Maling, T.J.B., see Siebers, R.W.L. (172) 239
- Mandara, I., see Vaccaro, A.M. (172) 323
- Masturzo, P., see Diomedé, L. (172) 161
- Matuse, R., see Uchida, K. (172) 101
- Mayer, T.K. and Mooney, R.A.  
Laboratory analyses for steroid hormone receptors, and their applications to clinical medicine (172) 1
- McCulloch, J.C. and Mendelsohn, D.  
Fetal lung maturity tests on the  $10000 \times g$  pellet (172) 47
- McKay, E.J., see Robertson, A.M. (172) 171
- Meijler, F.L., see Meleagros, L. (172) 199
- Meleagros, L., Ghaté, M.A., Anderson, J.V., Wharton, J., Taylor, K.M., Krikler, D.M., Meijler, F.L., Polak, J.M. and Bloom, S.R.  
The presence and molecular forms of cardiolipin immunoreactivity in the human and rat right atrium (172) 199
- Mendelsohn, D., see McCulloch, J.C. (172) 47
- Miura, K., see Ishizuka, T. (172) 109
- Mooney, R.A., see Mayer, T.K. (172) 1
- Mori, H., see Ishizuka, T. (172) 109
- Morris, R.W., see Watts, G.F. (172) 191
- Müller, M.M., see Chiba, P. (172) 141
- Naccarato, R., see Vianello, F. (172) 335
- Nagao, S., see Ishizuka, T. (172) 109
- Nagata, K., see Kondo, H. (172) 131
- Nagata, K.-i., see Ishizuka, T. (172) 109
- Nakao, M., see Shiba, K.S. (172) 77
- Nakaoka, H., see Amuro, Y. (172) 117
- Nozawa, Y., see Ishizuka, T. (172) 109
- Okuda, K., see Tatsumi, N. (172) 85
- Okuda, S., see Uchida, K. (172) 101
- O'Reilly, D.S.J., see Series, J.J. (172) 217
- Orii, T., see Suzuki, Y. (172) 65
- Orii, Y., see Tanaka, A. (172) 93

- Zwiauer, K., see Chiba, P. (172) 141

Clinica Chimica Acta, Vol. 172 (1988)

## Subject index

***N*-Acetyl-allo-isoleucine**

Maple syrup urine disease; Gas chromatography-mass spectrometry; *N*-Acetylvaline; *N*-Acetyl-leucine; *N*-Acetyl-isoleucine; *N*-Acetyl-amino acid (Lehnert, W. (172) 123)

***N*-Acetyl-amino acid**

Maple syrup urine disease; Gas chromatography-mass spectrometry; *N*-Acetylvaline; *N*-Acetyl-leucine; *N*-Acetyl-isoleucine; *N*-Acetyl-allo-isoleucine (Lehnert, W. (172) 123)

***N*-Acetyl-isoleucine**

Maple syrup urine disease; Gas chromatography-mass spectrometry; *N*-Acetylvaline; *N*-Acetyl-leucine; *N*-Acetyl-allo-isoleucine; *N*-Acetyl-amino acid (Lehnert, W. (172) 123)

***N*-Acetyl-leucine**

Maple syrup urine disease; Gas chromatography-mass spectrometry; *N*-Acetylvaline; *N*-Acetyl-isoleucine; *N*-Acetyl-allo-isoleucine; *N*-Acetyl-amino acid (Lehnert, W. (172) 123)

***N*-Acetyl-valine**

Maple syrup urine disease; Gas chromatography-mass spectrometry; *N*-Acetyl-leucine; *N*-Acetyl-isoleucine; *N*-Acetyl-allo-isoleucine; *N*-Acetyl-amino acid (Lehnert, W. (172) 123)

**Activator protein**

Glucosylceramidase, Gaucher disease (Vaccaro, A.M. (172) 323)

**Adenine phosphoribosyltransferase**

Enzyme deficiency; Purine metabolism (Chiba, P. (172) 141)

**Albumin**

Normal human urinary proteins; Sodium dodecyl sulphate-polyacrylamide gel electrophoresis; Silver staining; Uromucoid (Shiba, K.S. (172) 77)

**Albumin assay**

Albumin hydrolytic activity; Chromogenic substrate; Fluorogenic substrate (Gürakar, A.R. (172) 35)

**Albumin hydrolytic activity**

Albumin assay; Chromogenic substrate; Fluorogenic substrate (Gürakar, A.R. (172) 35)

**Alkaline phosphatase**

Monoclonal antibody; Serum isoenzyme (Seabrook, R.N. (172) 261)

Monoclonal antibody; Serum isoenzyme; Pregnancy (Bailey, E.M. (172) 267)

**Amniotic fluid**

Fetal lung maturity; Pellet, 10000 × g; Phosphatidylglycerol; L/S ratio; Lecithin (McCulloch, J.C. (172) 47)

Fetal status; Respiratory distress syndrome; Lecithin; Fluoride electrode (Diomedea, L. (172) 161)

 **$\alpha$ -Amylase assay**

$\alpha$ -Amylase in biological fluid; Elimination of glucose and maltose; Thermostable enzymes; Maltopentaose; Defined substrate (Kondo, H. (172) 131)

 **$\alpha$ -Amylase in biological fluid**

$\alpha$ -Amylase assay; Elimination of glucose and maltose; Thermostable enzymes; Maltopentaose; Defined substrate (Kondo, H. (172) 131)

**Anomeric specificity**

Erythrocytes; D-Glucose metabolism (Malaisse-Lagae, F. (172) 223)

***N*-terminal pro-ANP**

Cardiodilatin; Radioimmunoassay; Chromatography; Atrium (Meleagros, L. (172) 199)

**Apolipoprotein A-I**

Electroimmunoassay; Lipoproteins; Monoclonal antibody; Human serum (Ayrault-Jarrier, M. (172) 149)

**Aspartate transaminase**

Glutathione *S*-transferase; Chronic active hepatitis (Hayes, P.C. (172) 211)

**Atherosclerosis**

Cholesterol; Hypothyroidism; Thyroxine; Coronary risk (Series, J.J. (172) 217)

**Atrium**

Cardiodilatin; *N*-terminal pro-ANP; Radioimmunoassay; Chromatography (Meleagros, L. (172) 199)

**Band 3**

Myotonic dystrophy; Erythrocyte membrane; Sialic acid (Sydow, O. (172) 57)

**R-Binders**

Transcobalamine II; Cobalamine; Vitamin B<sub>12</sub> (Van Kapel, J. (172) 297)

**Blood preservation**

Sodium-lithium countertransport; Sodium; Erythrocyte; Hypertension; Epidemiology (Siebers, R.W.L. (172) 239)

**Blood sugar**

Glucose; Glycolysis inhibitor; NaF; Monoiodoacetic acid (Uchida, K. (172) 101)

**Cacodylate buffer**

UDP-Galactosyltransferase; Inhibition (Boyle, F.A. (172) 291)

**Carboxypeptidase N**

Creatine kinase; MM isoforms; Post-translational modification; Myocardial infarction; Kininase I (Hendriks, D. (172) 253)

**Cardiodilatin**

*N*-terminal pro-ANP; Radioimmunoassay; Chromatography; Atrium (Meleagros, L. (172) 199)

**Cell surface**

Cystic fibrosis; Glycoconjugates; Human skin fibroblasts (Sarras, Jr., M.P. (172) 311)

**Chemiluminescence**

Neutrophil; Platelet activating factor; C-reactive protein (Tatsumi, N. (172) 85)

**Cholesterol**

Hypothyroidism; Atherosclerosis; Thyroxine; Coronary risk (Series, J.J. (172) 217)

**Chromatography**

Cardiodilatin; *N*-terminal pro-ANP; Radioimmunoassay; Atrium (Meleagros, L. (172) 199)

**Chromogenic substrate**

Albumin assay; Albumin hydrolytic activity; Fluorogenic substrate (Gürakar, A.R. (172) 35)

**Chronic active hepatitis**

Glutathione *S*-transferase; Aspartate transaminase (Hayes, P.C. (172) 211)

**acyl-CoA dehydrogenase deficiency**

Medium chain fatty acid; Octanoic acid; Decanoic acid; Dodecanoic acid (Vici, C.D. (172) 233)

**Cobalamine**

Transcobalamine II; R-Binders; Vitamin B<sub>12</sub> (Van Kapel, J. (172) 297)

**Concanavalin A**

Phorbol ester; Protein kinase C; Thymoma; Translocation; Myasthenia gravis (Ishizuka, T. (172) 109)

**Coronary risk**

Cholesterol; Hypothyroidism; Atherosclerosis; Thyroxine (Series, J.J. (172) 217)

**C-reactive protein**

Neutrophil; Chemiluminescence; Platelet activating factor (Tatsumi, N. (172) 85)

**Creatine kinase**

Carboxypeptidase N; MM isoforms; Post-translational modification; Myocardial infarction; Kininase I (Hendriks, D. (172) 253)

**Crohn's disease**

Indigoid pigments; Porphyria cutanea tarda (Jackson, A.H. (172) 245)

**Cystic fibrosis**

Cell surface; Glycoconjugates; Human skin fibroblasts (Sarras, Jr., M.P. (172) 311)

**HDL subfraction**

Gradient gel electrophoresis (Gambert, P. (172) 183)

**Hemoglobin**

Human liver mitochondria; Cytochrome; Liver cirrhosis (Tanaka, A. (172) 93)

**High-performance liquid chromatography**

Modified nucleoside; Pseudouridine (Amuro, Y. (172) 117)

Fatty acid ester; Subcellular distribution; Liver tissue; Vitamin A metabolism; Vitamin A deficiency (Periquet, B. (172) 275)

**Human liver mitochondria**

Cytochrome; Hemoglobin; Liver cirrhosis (Tanaka, A. (172) 93)

**Human serum**

Electroimmunoassay; Lipoproteins; Apolipoprotein A-I; Monoclonal antibody (Ayrault-Jarrier, M. (172) 149)

**Human skin fibroblasts**

Cystic fibrosis; Cell surface; Glycoconjugates (Sarras, Jr., M.P. (172) 311)

**Human small intestine**

Enzyme-linked immunosorbent assay (ELISA); Mucin; Mucous glycoprotein; Ileum (Roberton, A.M. (172) 171)

**Hypertension**

Sodium-lithium countertransport; Sodium; Erythrocyte; Blood preservation; Epidemiology (Siebers, R.W.L. (172) 239)

**Hypothyroidism**

Cholesterol; Atherosclerosis; Thyroxine; Coronary risk (Series, J.J. (172) 217)

**Ileum**

Enzyme-linked immunosorbent assay (ELISA); Mucin; Mucous glycoprotein; Human small intestine (Roberton, A.M. (172) 171)

**Indigoid pigments**

Crohn's disease; Porphyria cutanea tarda (Jackson, A.H. (172) 245)

**Inhibition**

UDP-Galactosyltransferase; Cacodylate buffer (Boyle, F.A. (172) 291)

**In vitro translation**

Zellweger syndrome; Zellweger-like syndrome; Peroxisome;  $\beta$ -Oxidation; Pulse-chase experiments (Suzuki, Y. (172) 65)

**Kinase I**

Carboxypeptidase N; Creatine kinase; MM isoforms; Post-translational modification; Myocardial infarction (Hendriks, D. (172) 253)

**Lecithin**

Amniotic fluid; Fetal lung maturity; Pellet, 10 000  $\times$  g; Phosphatidylglycerol; L/S ratio (McCulloch, J.C. (172) 47)

Fetal status; Respiratory distress syndrome; Amniotic fluid; Fluoride electrode (Diomedea, L. (172) 161)

**Lipoproteins**

Electroimmunoassay; Apolipoprotein A-I; Monoclonal antibody; Human serum (Ayrault-Jarrier, M. (172) 149)

**Liver cirrhosis**

Human liver mitochondria; Cytochrome; Hemoglobin (Tanaka, A. (172) 93)

**Liver tissue**

Fatty acid ester; High performance liquid chromatography; Subcellular distribution; Vitamin A metabolism; Vitamin A deficiency (Periquet, B. (172) 275)

**L/S ratio**

Amniotic fluid; Fetal lung maturity; Pellet, 10 000  $\times$  g; Phosphatidylglycerol; Lecithin (McCulloch, J.C. (172) 47)

**Maltopentaose**

$\alpha$ -Amylase assay;  $\alpha$ -Amylase in biological fluid; Elimination of glucose and maltose; Thermostable enzymes; Defined substrate (Kondo, H. (172) 131)

**Maple syrup urine disease**

Gas chromatography-mass spectrometry; *N*-Acetylvaline; *N*-Acetyllecine; *N*-Acetylisoleucine; *N*-Acetyl-allo-isoleucine; *N*-Acetyl-amino acid (Lehnert, W. (172) 123)

**Medium chain fatty acid**

acyl-CoA dehydrogenase deficiency; Octanoic acid; Decanoic acid; Dodecanoic acid (Vici, C.D. (172) 233)

**Microalbuminuria**

Urinary albumin excretion; Reference range (Watts, G.F. (172) 191)

**MM isoforms**

Carboxypeptidase N; Creatine kinase; Post-translational modification; Myocardial infarction; Kininase I (Hendriks, D. (172) 253)

**Modified nucleoside**

Pseudouridine; High-performance liquid chromatography (Amuro, Y. (172) 117)

**Monoclonal antibody**

Electroimmunoassay; Lipoproteins; Apolipoprotein A-I; Human serum (Ayrault-Jarrier, M. (172) 149)

Alkaline phosphatase; Serum isoenzyme (Seabrook, R.N. (172) 261)

Alkaline phosphatase; Serum isoenzyme; Pregnancy (Bailey, E.M. (172) 267)

**Monoiodoacetic acid**

Blood sugar; Glucose; Glycolysis inhibitor; NaF (Uchida, K. (172) 101)

**Mucin**

Enzyme-linked immunosorbent assay (ELISA); Mucous glycoprotein; Ileum; Human small intestine (Robertson, A.M. (172) 171)

**Mucous glycoprotein**

Enzyme-linked immunosorbent assay (ELISA); Mucin; Ileum; Human small intestine (Robertson, A.M. (172) 171)

**Myasthenia gravis**

Concanavalin A; Phorbol ester; Protein kinase C; Thymoma; Translocation (Ishizuka, T. (172) 109)

**Myocardial infarction**

Carboxypeptidase N; Creatine kinase; MM isoforms; Post-translational modification; Kininase I (Hendriks, D. (172) 253)

**Myotonic dystrophy**

Erythrocyte membrane; Band 3; Sialic acid (Sydow, O. (172) 57)

**NaF**

Blood sugar; Glucose; Glycolysis inhibitor; Monoiodoacetic acid (Uchida, K. (172) 101)

**Neutrophil**

Chemiluminescence; Platelet activating factor; C-reactive protein (Tatsumi, N. (172) 85)

**Normal human urinary proteins**

Sodium dodecyl sulphate-polyacrylamide gel electrophoresis; Silver staining; Uromucoid; Albumin (Shiba, K.S. (172) 77)

**Octanoic acid**

Medium chain fatty acid; acyl-CoA dehydrogenase deficiency; Decanoic acid; Dodecanoic acid (Vici, C.D. (172) 233)

 **$\beta$ -Oxidation**

Zellweger syndrome; Zellweger-like syndrome; Peroxisome; In vitro translation; Pulse-chase experiments (Suzuki, Y. (172) 65)

**Pellet, 10000  $\times$  g**

Amniotic fluid; Fetal lung maturity; Phosphatidylglycerol; L/S ratio; Lecithin (McCulloch, J.C. (172) 47)

**Pepsinogen group I**

Total serum pepsinogen; Peptic ulcer (Vianello, F. (172) 335)

**Peptic ulcer**

Total serum pepsinogen; Pepsinogen group I (Vianello, F. (172) 335)

**Peroxisome**

Zellweger syndrome; Zellweger-like syndrome;  $\beta$ -Oxidation; In vitro translation; Pulse-chase experiments (Suzuki, Y. (172) 65)

**Phorbol ester**

Concanavalin A; Protein kinase C; Thymoma; Translocation; Myasthenia gravis (Ishizuka, T. (172) 109)

**Phosphatidylglycerol**

Amniotic fluid; Fetal lung maturity; Pellet, 10000  $\times$  g; L/S ratio; Lecithin (McCulloch, J.C. (172) 47)

**Platelet activating factor**

Neutrophil; Chemiluminescence; C-reactive protein (Tatsumi, N. (172) 85)

**Porphyria cutanea tarda**

Indigoid pigments; Crohn's disease (Jackson, A.H. (172) 245)

**Post-translational modification**

Carboxypeptidase N; Creatine kinase; MM isoforms; Myocardial infarction; Kininase I (Hendriks, D. (172) 253)

**Pregnancy**

Monoclonal antibody; Alkaline phosphatase; Serum isoenzyme (Bailies, E.M. (172) 267)

**Protein kinase C**

Concanavalin A; Phorbol ester; Thymoma; Translocation; Myasthenia gravis (Ishizuka, T. (172) 109)

**Pseudouridine**

Modified nucleoside; High-performance liquid chromatography (Amuro, Y. (172) 117)

**Pulse-chase experiments**

Zellweger syndrome; Zellweger-like syndrome; Peroxisome;  $\beta$ -Oxidation; In vitro translation (Suzuki, Y. (172) 65)

**Purine metabolism**

Adenine phosphoribosyltransferase; Enzyme deficiency (Chiba, P. (172) 141)

**Radioimmunoassay**

Cardiodilatin; N-terminal pro-ANP; Chromatography; Atrium (Meleagros, L. (172) 199)

**Reference range**

Urinary albumin excretion; Microalbuminuria (Watts, G.F. (172) 191)

**Respiratory distress syndrome**

Fetal status; Amniotic fluid; Lecithin; Fluoride electrode (Diomedea, L. (172) 161)

**Serum isoenzyme**

Monoclonal antibody; Alkaline phosphatase (Seabrook, R.N. (172) 261)

Monoclonal antibody; Alkaline phosphatase; Pregnancy (Bailies, E.M. (172) 267)

**Sialic acid**

Myotonic dystrophy; Erythrocyte membrane; Band 3 (Sydow, O. (172) 57)

**Silver staining**

Normal human urinary proteins; Sodium dodecyl sulphate-polyacrylamide gel electrophoresis; Uromucoid; Albumin (Shiba, K.S. (172) 77)

**Sodium**

Sodium-lithium countertransport; Erythrocyte; Hypertension; Blood preservation; Epidemiology (Siebers, R.W.L. (172) 239)

**Sodium dodecyl sulphate-polyacrylamide gel electrophoresis**

Normal human urinary proteins; Silver staining; Uromucoid; Albumin (Shiba, K.S. (172) 77)

**Sodium-lithium countertransport**

Sodium; Erythrocyte; Hypertension; Blood preservation; Epidemiology (Siebers, R.W.L. (172) 239)

**Subcellular distribution**

Fatty acid ester; High performance liquid chromatography; Liver tissue; Vitamin A metabolism; Vitamin A deficiency (Periquet, B. (172) 275)

**Thermostable enzymes**

$\alpha$ -Amylase assay;  $\alpha$ -Amylase in biological fluid; Elimination of glucose and maltose; Maltopentaose; Defined substrate (Kondo, H. (172) 131)

**Thymoma**

Concanavalin A; Phorbol ester; Protein kinase C; Translocation; Myasthenia gravis (Ishizuka, T. (172) 109)

**Thyroxine**

Cholesterol; Hypothyroidism; Atherosclerosis; Coronary risk (Series, J.J. (172) 217)

**Total serum pepsinogen**

Pepsinogen group I; Peptic ulcer (Vianello, F. (172) 335)

**Transcobalamine II**

R-Binders; Cobalamine; Vitamin B<sub>12</sub> (Van Kapel, J. (172) 297)

**Translocation**

Concanavalin A; Phorbol ester; Protein kinase C; Thymoma; Myasthenia gravis (Ishizuka, T. (172) 109)

**UDP-Galactosyltransferase**

Inhibition; Cacodylate buffer (Boyle, F.A. (172) 291)

**Urinary albumin excretion**

Reference range; Microalbuminuria (Watts, G.F. (172) 191)

**Uromucoid**

Normal human urinary proteins; Sodium dodecyl sulphate-polyacrylamide gel electrophoresis; Silver staining; Albumin (Shiba, K.S. (172) 77)

**Vitamin A deficiency**

Fatty acid ester; High performance liquid chromatography; Subcellular distribution; Liver tissue; Vitamin A metabolism (Periquet, B. (172) 275)

**Vitamin A metabolism**

Fatty acid ester; High performance liquid chromatography; Subcellular distribution; Liver tissue; Vitamin A deficiency (Periquet, B. (172) 275)

**Vitamin B<sub>12</sub>**

Transcobalamine II; R-Binders; Cobalamine (Van Kapel, J. (172) 297)

**Zellweger-like syndrome**

Zellweger syndrome; Peroxisome;  $\beta$ -Oxidation; In vitro translation; Pulse-chase experiments (Suzuki, Y. (172) 65)

**Zellweger syndrome**

Zellweger-like syndrome; Peroxisome;  $\beta$ -Oxidation; In vitro translation; Pulse-chase experiments (Suzuki, Y. (172) 65)
